This Year's Slogan— Grow More for 1944

Beside your patriotic duty, it's just plain good sense to grow your own vegetables this year. If you have, or can get the use of a sunny piece of good land we urge you to make a Victory Garden. With careful planning you'll be surprised at the big quantity of appetizingly fresh, healthful, vitamin-packed vegetables you can grow on a space even 25 x 25 feet.

We show on this page two helpful charts. Rather than buy seed collections, plan your garden to your family's tastes. We are ready to help. But start right with the best seeds. Since 1898 we have supplied thousands of tons of vegetable seeds to the nation's most progressive, commercial vegetable farmers who use only the best.

Phone (MArket 2-3740) or mail us your order. We'll get it to you promptly. Only orders of \$1 or more sent C.O.D.

Forbes Vegetable Seeds for Your Victory Garden

Growing vegetables is patriotic and really necessary. It's interesting and healthful, too, not to speak of the supply of nourishing food at little cost. But it's not all fun. To succeed use good soil in the sun, plan well, and carefully select your varieties. Keep your crops free from weeds and well cultivated. But most important of all, plant the best seeds, for good vegetables do not grow from poor seeds.

Since 1898 Forbes Seeds have been used in huge quantities by the farmers who grow the vegetables you have bought at your vegetable store. Use these same Forbes Seeds in your own garden.

This selection of varieties will give you the best results. Order early for many are in short supply.

Forbes Fine Flower Seeds

During war time it is essential to keep up morale. Long work hours, anxiety about our men and women in service, the dislocation of our normal lives, all call for some comforting distraction. Here's where bright flower borders will help. And flowers can well be used to outline or brighten up a vegetable garden. With less opportunity to vacation this year, fix up your garden. Grow flowers.

Seeds of Annual Flowers

With a delicate beauty and shades of color all their own, Annuals sprout from seed, grow, flower, fruit and die all within the garden year. They are easily grown from seed. Many provide beautiful cut-flowers; all improve a garden. They range in height from dwarf edging plants to tall background subjects.

Forbes Summer-Flowering Bulbs

During recent years there has been more interest shown in these summer and fall flowers produced from spring- and early summer-planted bulbs or roots. They are easily grown in any garden soil with assurance of success.

Amaryllis

For outdoors, start in pots indoors and in June plunge in warm sunny border. For indoor display pot the bulbs singly in 6-inch pots in good garden loam enriched with bone-meal. Water slightly and keep in a dark place at 50 to 60° temperature for about a month until well rooted, then expose to full sun and water regularly. It is essential for good bloom that the roots become crowded in the pot.

Giant-flowered Hybrids. Trumpet-like blooms on strong stems. The colors range from beautiful markings of rose, red, and crimson on white grounds to scarlet, crimson, bright red, cherry, and maroon self colors. 60c. each; \$6 per doz.

Begonias

These are excellent for shady borders, and fine for indoor house plants. For bedding, plant the tubers outdoors late in May, 10 inches apart. They require ample moisture and good drainage. Start tubers indoors in March or April and later transplant outdoors to give earlier bloom.

Single, Tuberous-rooted. Waxy, broad-petaled, single flowers in abundance on ample foliage. Excellent for shade. **Crimson, Pink, Scarlet, and Yellow,** 40c. ea.; \$4 per doz.

Fancy-leaved Caladiums

Few summer foliage plants equal these, in their rich and gorgeous coloring for outdoor bedding in shady or semi-shady positions. Start bulbs in pots, planting one bulb to a 6-inch pot. Use a well-drained sandy loam, water sparingly, and keep at 60° until well started. Then water quite freely. **Extra-choice Mixture,** 35c. each; \$3.50 per doz.

Canna Roots

Plant dormant roots in any sunny position after May 15, 2 feet apart with the "eye" just above the ground. They are most effective when planted in masses of one variety.

City of Portland. Clear fadeless rose. Green foliage. Ht. 5 ft.
Eureka. Perfect creamy white flowers. Green foliage. Ht. 4½ ft.
King Humbert. Rich orange-scarlet. Bronze foliage. Ht. 5 ft.
King Midas. Canary-yellow flowers. Green foliage. Ht. 4 ft.
The President. Bright red flowers. Green foliage. Ht. 5 ft.
Wintzer's Colossal. Bright scarlet. Green foliage. Ht. 5 ft.

Largest dormant roots of any of above, 3 for 40c.; \$1.25 per doz.; \$9 per 100

Cinnamon Vine

A rapid-growing climber with glossy foliage, and cinnamon-scented, white flowers. Hardy. Giant, select roots, 15c. each; \$1.50 per doz.; \$9 per 100.

Hardy Lilies

These hardy, thrifty flowers like partial shade and appear best when planted in groups against a background of shrubbery. They thrive in well-drained borders and bloom in midsummer when fine flowers are scarce.

Regale (The Royal Lily). Funnel-shaped white blooms, shaded pink and streaked brown on the outside; flushed yellow inside. Ht. 5 to 7 ft. Bloom in July. 8 in. deep. 9-10 in. bulbs, 30c. each; \$3 per doz.

Tenuifolium (Coral Lily). Thread-like leaves and clusters of bell-like, recurved, coral-red flowers. Ht. 3 to 4 ft. Bloom in June. 6 in. deep. 20c. each; \$2 per doz.

Gladiolus

To get the best effect mass them together in solid beds, plant them in borders, and among shrubbery. With successive planting from April through June, they bloom from July until frost. Plant 4 inches deep and 4 inches apart, in full sunshine.

Bagdad. Midseason. An attractive smoky old-rose deepening toward the edges. 85c. per doz.; \$6 per 100.

Beacon. A bright rose-scarlet with a very large cream throat-blotch. Very sturdy. \$1 per doz.; \$7.50 per 100.

Commander Koehl. Late. One of the best reds—a brilliant scarlet-blood-red. \$1 per doz.; \$7.50 per 100.

Dr. F. E. Bennett. Huge deep fiery scarlet blooms suffused peach-red. 85c. per doz.; \$6 per 100.

Gate of Heaven. Early. The deepest yellow of all, forming large ruffled florets. 95c. per doz.; \$7 per 100.

King Arthur. Early. Large ruffled, fluted lavender-pink penciled with darker markings. 85c. per doz.; \$6 per 100.

Maid of Orleans. Midseason. Beautiful pure white florets with creamy throats. 95c. per doz.; \$7 per 100.

Minuet. Late. Beautiful, clear, light lavender-pink florets on strong stems. 85c. per doz.; \$6 per 100.

Orange Princess. Early. Slightly ruffled pure salmon-orange florets, paler in the throats. \$1 per doz.; \$7.50 per 100.

Peggy Lou. Pink florets with a blue suffusion giving an opalescent effect. 95c. per doz.; \$7 per 100.

Pelegrina. Early. Large florets of fine dark violet-blue on good strong stems. 95c. per doz.; \$7 per 100.

Picardy. Midseason. Large delicate apricot-pink florets; somewhat ruffled and wax-like. 85c. per doz.; \$6 per 100.

Rosa van Lima. Pure light pink with florets well spaced on strong, straight stems. \$1 per doz.; \$7.50 per 100.

Shirley Temple. Ruffled large white florets with cream throat. Finest for exhibition. 95c. per doz.; \$7 per 100.

Vagabond Prince. Shining reddish brown florets, the lower petals splashed with vermilion. 95c. per doz.; \$7 per 100.

Forbes Rainbow Gladiolus Mixture

Prepared from largest bulbs of **ten named** varieties of **ten** different shades of color. Far superior to ordinary commercial bulb mixtures of unknown color balance. Each 50 bulbs consists of 5 bulbs of each shade, assuring evenly distributed colors.

65c. for 10 bulbs; \$2.85 for 50; \$5.50 per 100; \$50 per 1000

Montbretias

Plant April or May, 6 inches apart, 4 inches deep, in groups. **Mixed Hybrids.** A fine assortment. 85c. per doz.; \$6 per 100.

Peonies

Magnificent flower; handsome foliage throughout the season. They last a week or more when cut. Plant them with 2 inches of earth over the buds. We offer 2-year-old clumps with 3 to 5 eyes, in three colors—Double White, Double Pink, and Double Red, at 50c. each; 3 for \$1.35; \$5 per doz.

Tuberose

Plant outdoors after May 15, at intervals as late as July. **Excelsior, Double Pearl.** Spikes 3 feet high, with double waxy camellia-like white flowers of delightful fragrance. 60c. per doz.; \$4 per 100.

Hardy Perennial Plants

The Perennial Plants we offer are of unusually large size, in large pots, with ample soil for strong root development. They are plants produced to succeed in your garden rather than for a conveniently small size for shipping. When you see them in the sales beds at our sales garden on Route 10, Hanover, N. J., you will instantly recognize their superior quality.

We lift the plants, in pots, and place them in your car. Within the hour you can remove the pots and set the plants out in your garden, to continue their growth unchecked. Besides this, our large plants provide earlier, fuller bloom the first season, without loss.

For equal cost our plants are far superior. Come and make your own selection and take them with you, or send in your order and we will deliver within our delivery area. See page 16.

Above, from the "Forbes" Lawn Grass Seed

Be Sure to See the Lawn Exhibits at Our Display Garden on Route 10, Hanover, N. J.

So that you may easily see the difference in turf textures and quality, we have planted grass plots, side by side, of the various lawn seed mixtures as well as of the individual grass varieties. These afford a splendid and convenient opportunity for you to make comparisons of the various lawn grasses.

Below, from our Elite Lawn Grass Seed

Forbes Lawn Seed for Every Need

The best in seeds and care is essential to have a fine lawn. Forbes quality, known the country over, has set a high lawn standard, and Forbes service is at your disposal at all times.

Many grades of lawn grass seeds of varying qualities are offered for sale. Many contain seeds of worthless character, chaff, and weed seeds. Often a single variety or a blend of two grasses is sold as lawn seed. The best lawn is produced from a mixture of several natural grasses. To be of greatest value, these grasses must be properly proportioned in the mixture so that there is enough of each to serve its specific purpose.

The mixtures we offer, made up from special formulæ, are the result of years of experiment and of practical tests. Each mixture will produce a turf ideally suited to each purpose.

The "Forbes" Lawn Grass Seed

A rapid-growing combination of grasses which produces in from four to six weeks, a permanent lawn capable of withstanding heavy wear. It contains seeds of five dwarf evergreen and perennial grasses of fine lawn texture. Definite proportions of these are mixed very thoroughly. The resultant lawn has a fine, even, rich green appearance and a permanency not usually found. Known for its high quality, it is higher priced than ordinary store mixtures but cheapest in the long run. It contains only heavy, re-cleaned, live seeds, free from worthless chaff, timothy and weed seeds. We do not use White Clover seed in this mixture.

½lb. 35 cts.; lb. 65 cts.; 2 lbs. \$1.20; 5 lbs. \$2.90; 10 lbs. \$5.70; 25 lbs. \$14; 100 lbs. \$53, delivered. Complete directions with every package. For quickest results sow one pound to every 100 sq. ft. (10 x 10 ft.) of new ground, or 400 lbs. to the acre. Half this quantity gives good results but takes longer.

Elite Lawn Grass Seed

A very superior blend of only the finest and most desirable separate lawn grasses in such proportion as to produce a perfect lawn, but one which requires no special care such as an all-Bent Mixture. The Elite turf is of very fine texture and splendid deep green color yet is sturdy and withstands normal wear. It lends itself to easy mowing and because of its thick, close root-mat discourages the growth of ordinary weeds. It is not mixed to sell at a fixed price and is better value than cheaper mixtures.

Lb. 90 cts.; 2 lbs. \$1.75; 5 lbs. \$4.25; 10 lbs. \$8; 25 lbs. \$19.50; 100 lbs. \$75, delivered.

Branch Brook Park Lawn Grass Seed

This mixture, named for one of Newark's beautiful parks, is recommended for use where the low cost of materials is of more importance than extreme fineness of turf. The individual grasses used are of fine re-cleaned quality and high vitality. It will take about five weeks to produce a good covering of turf. This will withstand normal wear and has a fine color. We include no White Clover in this mixture.

½lb. 30 cts.; lb. 55 cts.; 2 lbs. \$1.05; 5 lbs. \$2.50; 10 lbs. \$4.85; 25 lbs. \$11.75; 100 lbs. \$45, delivered.

Lawn Clovers

Kent Clover (Wild White Clover). The plants bear fewer blossoms than ordinary white Clover, grow very close to the ground, are tenacious and form a dark green, thick sward. Oz. 35 cts.; ¼lb. \$1; lb. \$3; 10 lbs. \$27.50.

White Clover. A very hardy creeping perennial with dark green compact foliage. Used where it is difficult to produce a lawn with grass seed only. Use 1 lb. with 25 lbs. of lawn seed. ¼lb. 40 cts.; ½lb. 70 cts.; lb. \$1.30; 10 lbs. \$12; 100 lbs. \$110.

BE SURE TO FEED AND SEED YOUR LAWN

The great interest in Victory Vegetable Gardens may tempt you to neglect your lawn. Don't do this. To have a lasting, green lawn replenish it with lawn seed and plant food each year. This year we offer Lawn Fertilizer, a commercial fertilizer made specially for top-dressing lawns. Use this or one of the weed-free animal manures such as Bovung, Cow Manure, Driconure, Poultry Manure or Sheep Manure. See page 16.

Forbes Lawn Seed for Every Need

When comparing prices look on the package for the percentage analysis required by State Law. You'll find that you get your money's worth if you buy the "Forbes" Lawn Seed.

Shady Place Lawn Grass Seed

It is difficult to grow grass in the shade and under trees because the trees use up nearly all the food and moisture in the soil. This mixture will thrive better than any other and is the best possible for under trees. Water frequently until grass is well started.

1/2 lb. 45 cts.; lb. 80 cts.; 2 lbs. \$1.55; 5 lbs. \$3.75; 10 lbs. \$7; 25 lbs. \$17; 100 lbs. \$65, delivered.

Terrace Lawn Grass Seed

The grasses used for a sloping bank or terrace must have such roots as will withstand the washing caused by heavy rains. This mixture forms a network of densely matted roots of deep-rooting character. These deep roots will better withstand drought during the summer as they reach down below the surface dryness. After seeding, cover with a little soil and firm down to keep from washing out. On steep slopes it is sometimes best to cover after seeding with sheet burlap, pegged down.

1/2 lb. 45 cts.; lb. 80 cts.; 2 lbs. \$1.55; 5 lbs. \$3.75; 10 lbs. \$7; 25 lbs. \$17; 100 lbs. \$65, delivered.

Individual Grass Seeds

These are true, unblended new crop, re-cleaned to the highest purity and germination. The prices below are subject to market changes

Bent, Astoria (*Agrostis capillaris*). Dense matted sod binds well. Develops from strong underground runners. Sow 125 lbs. to the acre. Lb. \$1.75; 10 lbs. \$16.50; 100 lbs. \$150.

Bent, Colonial or Rhode Island (*Agrostis tenuis*). Makes excellent fine turf on moist soils. Lasts indefinitely under close mowing. This variety thrives well on acid soils. For lawns, sow 175 lbs. to the acre. Lb. \$1.75; 10 lbs. \$16.50; 100 lbs. \$150.

Canada Blue Grass (*Poa compressa*). A suitable grass for hard, dry soils. Excellent for rooting on steep places. Sow 42 lbs. to the acre. Lb. 70 cts.; 10 lbs. \$6.50; 100 lbs. \$55.

Chewing's New Zealand Fescue (*Festuca rubra fallax*). Mat-like, green, tough turf with needle-like, bristly leaves suited to almost all soils including sand. Does well in shade. Fine for lawns. For lawn, sow 40 lbs. per acre. Lb. \$1; 10 lbs. \$9.50; 100 lbs. \$85.

Common Ryegrass. This is a mixture of Italian Ryegrass and English Ryegrass, grown in the United States. Lb. 40 cts.; 10 lbs. \$3.50; 100 lbs. \$25.

Perennial Ryegrass (*Lolium perenne*). Forms compact sward, bright green through season, and is a rapid grower. Sow 60 lbs. to the acre. Lb. 55 cts.; 10 lbs. \$5; 100 lbs. \$45.

Kentucky Blue Grass, Superfine (*Poa pratensis*). Suited to a variety of soils and used as pasture. It is unusually early, showing green in early spring when other grasses are still dormant. Sow 60 lbs. to the acre. Lb. 70 cts.; 10 lbs. \$6.50; 100 lbs. \$55.

Meadow Fescue (*Festuca pratensis*). Fine annual grass for permanent pastures, highly nutritious and relished by stock. Succeeds well in all soils but best on moist land. Grows over a long season. Sow 60 lbs. to the acre. Lb. 65 cts.; 10 lbs. \$6; 100 lbs. \$50.

Orchard Grass (*Dactylis glomerata*). Valuable on account of its earliness and rapid growth. Succeeds on any soil, especially in moist, shady places. As it is inclined to grow in tufts, sow it evenly. Sow 50 lbs. to the acre. Lb. 70 cts.; 10 lbs. \$6.50; 100 lbs. \$60.

Redtop Fancy, Superfine (*Agrostis palustris*). Used for mixing in hay or permanent pasture in a moist, rich soil where it attains a height of 2 1/2 feet. We offer best quality re-cleaned seeds, free from chaff. Sow 32 lbs. to the acre. Lb. 55 cts.; 10 lbs. \$5; 100 lbs. \$40.

Timothy (*Pbleum pratense*). Perennial, 4 feet high, thrives in moist, loamy soils. Sow 40 lbs. per acre. Lb. 25 cts.; 10 lbs. \$2; 100 lbs. \$15. (A bushel weighs 45 lbs.)

Field Clovers

The prices below are subject to market changes. Samples and current prices on request. Please compare our quality when you consider other offers

Alfalfa. When once established Alfalfa has no equal as a hay-producer—three to four cuttings in a season—yielding from 4 to 6 tons per acre. It sends long taproots down into the sub-soil and is one of the best forage crops and valuable as a soil-enricher. Sow 20 to 30 lbs. per acre. Weighs 60 lbs. to the bushel. Lb. 70 cts.; 10 lbs. \$6.50.

Alsike. The hardest of all and stands freezing. Good for green forage, pasture, or hay, it is sown with other grasses and Clovers, forming a thick bottom and increasing the hay-yield. Sow, if alone, 8 lbs. per acre; if used with Red Clover and Timothy, add 3 lbs. per acre. Weighs 60 lbs. to the bushel. Lb. 65 cts.; 10 lbs. \$6.

Bokhara (Sweet White-flowering). Flowers from June to September; 4 feet high. Fine for bees. Sow 10 lbs. to the acre. Weighs 60 lbs. to the bushel. Lb. 35 cts.; 10 lbs. \$3.40.

Grimm Alfalfa. Withstands low temperatures and cuts better in the fall than any. Has larger crowns, wider root-system, and yields heavier. Thrives in undrained wet soils. Sow 20 lbs. per acre. Weighs 60 lbs. to the bushel. Lb. 75 cts.; 10 lbs. \$7.

Red. Does well on all except sour soils growing two crops per year 2 feet high. It yields 2 to 3 tons of cured hay per acre. If alone, sow broadcast 12 to 14 lbs. to the acre. Weighs 60 lbs. to the bushel. Lb. 65 cts.; 10 lbs. \$6.

Forbes Fertilizers and Soil-Builders

These prices are subject to change without notice

The success of your garden depends upon the quality of the soil. All plants need ample plant-food. By ample is meant not only the quantity but also the availability. The soil must hold plant-food and moisture, yet be in such condition that the plant roots can absorb what is needed. It should be sufficiently rich in humus or decayed vegetation to absorb excess moisture and hold it for later use. It should have enough clay to give it some body and enough sand to make it porous and friable. But even with a perfect soil, plant-food must be added each year to replace that which is consumed.

Acid Super-Phosphate. This yields valuable Phosphoric Acid. Apply 1000 lbs. to each acre or 20 lbs. per 1000 sq. ft. as a top-dressing for lawns, and drench thoroughly with water. Avoid use when hot. 25 lbs. 90c.; 100 lbs. \$2.75; 500 lbs. \$12.50.

Adco. For making artificial manure by stacking straw, leaves and other vegetable waste, layer by layer, mixing it with Adco, and keeping it wet until well rotted. A 25-lb. bag with 12 wheelbarrow loads of garden waste, makes $\frac{1}{2}$ ton of manure. 7 $\frac{1}{2}$ lbs. \$1; 25-lb. bag \$2.25; 150-lb. bag \$10.50.

Aluminum Sulphate. Use to acidify the soil in rhododendron beds, and other sour-soil plants. Use a liberal sprinkling by hand several times a year. 5 lbs. 50c.; 10 lbs. 80c.; 25 lbs. \$1.50; 100 lbs. \$4.75.

Bone-Meal. Because of its slow disintegrating and long-lasting qualities, this is desirable for fertilizing all hard-wooded plants, including roses, flowering shrubs, fruit bushes, and trees. A liberal application mixed into the soil before planting bulbs of tulips, hyacinths, etc., will result in remarkable size and brilliancy of flowers. For lawns it is a dependable fertilizer, as it contains the essentials that grass requires. May be broadcast as a top-dressing either in early spring or during the growing season with beneficial results. For this use 25 lbs. for every 1000 sq. ft. For trees and vines, use 2 to 4 lbs. each. For roses and pot-plants, use 1 part to about 50 parts of soil. For field and garden crops or making new lawns, use 50 lbs. for every 1000 sq. ft. Not available at present. If available later, price supplied on application.

Bovung. A dehydrated, pulverized cow-manure product free from weed seeds. Clean, odorless, easily applied. Apply 50 lbs. to 200 sq. ft. of new lawn, half that much to top-dress old lawns. 50 lbs. \$1.85; 100 lbs. \$3.60; 500 lbs. \$17.50.

Cow-Manure. In dry pulverized form and easy to handle. This is an ideal soil-builder and mulch, particularly for perennial beds. It is fine for lawn, garden and greenhouse and excellent to mix with compost. When used for top-dressing it works down into the soil, leaving no waste. 25 lbs. \$1.50; 50 lbs. \$2.50; 100 lbs. \$4.50; 500 lbs. \$20; ton \$70.

Driconure. This is the improved product, containing about $\frac{3}{4}$ cow and $\frac{1}{4}$ peat moss, finely ground and easy to apply. This complete all-organic fertilizer and soil-conditioner is free from weed seeds, insect infestation and trash of any kind. The peat moss prevents burning as it holds the plant-food and moisture until they are used up by the plant roots. Driconure is ideal for top-dressing lawn or garden. 50 lbs. \$2; 100 lbs. \$3.90; 500 lbs. \$19; 1000 lbs. \$36; ton \$70.

Hormodin Powder No. 1. For plant propagation. Produces better roots faster. Dip moistened stems of cuttings of house, garden and greenhouse plants in powder before placing in propagating bed. 1 $\frac{1}{4}$ -oz. size, 50c.

Hyper-Humus. This ideal soil-builder for lawn or garden is a pure organic material similar to leaf mould but of finer texture and is non-acid. Humus gives to soil that porous, crumbly condition essential to plant-growth; renders clay soils lighter in character and more aerated; binds together sandy soils; and increases the moisture-retaining quality of all soils. It is odorless, dry, and easily handled, and absolutely free from weed seeds. Fine for mixing with potting-soil. On new lawns, apply 100 pounds per 60 square feet. In top-dressing old lawns, use 100 pounds per 100 square feet. In bags, 50 lbs. \$1.25; 100 lbs. \$2; 500 lbs. \$9; 1000 lbs. \$15; ton \$28. Special price on bulk delivered.

Lawn Fertilizer. For lawns, shrubs, etc. A properly balanced commercial fertilizer for this purpose. Top-dress 25 lbs. per 1000 sq. ft. each spring to maintain a rich green, healthy growth. On new lawns use 50 lbs. per 1000 sq. ft. and rake in surface soil. 25 lbs. \$1.50; 50 lbs. \$2.50; 100 lbs. \$4; 500 lbs. \$19; 1000 lbs. \$36.

Lime, Hydrated Agricultural. Corrects acid conditions of the soil, binds loose soils and opens heavy land. It is very quick-acting but will not burn if scattered evenly when lawn is dormant. As an early spring or late fall dressing for lawns, broadcast 50 lbs. per 1000 sq. ft. 10 lbs. 35c.; 50 lbs. 70c.; 100 lbs. \$1.30; 500 lbs. \$6; ton \$21. Broadcast 1 ton to the acre.

Limestone, Pulverized. Easier to apply than Hydrated Lime and does not "gum up" on wet soils. Use 70 lbs. per 1000 sq. ft. broadcast. 80-lb. bag 75c.; 400 lbs. \$3.50; 800 lbs. \$6.50; ton \$15.50.

Nitrate of Soda. A quick plant-stimulant. Use not more than 1 lb. to 100 sq. ft., raked in. For lawns, use 5 lbs. per 1000 sq. ft., but first mix with four times its bulk of fine soil or sand. As a liquid use 1 oz. in 1 gal. of water. 5 lbs. 60c.; 10 lbs. \$1.

Victory Garden Fertilizer. Analysis 5-10-5

For food-production only. This is the best commercial fertilizer for your Victory Vegetable Garden and small fruits. It is a well-balanced, complete fertilizer containing all the food elements needed for quick growth, early maturity, and perfect development. For gardens broadcast 100 pounds per 1000 sq. ft. and rake in well or mix a little thoroughly through the soil in the bottom of the furrow before planting your seeds. Hoe it into the soil between the rows of plants, using about 5 pounds to 100 feet, repeat this each month. 5 lbs. 50c.; 10 lbs. 80c.; 25 lbs. \$1.40; 50 lbs. \$2.20; 100 lbs. \$3.50; 500 lbs. \$16.50; ton \$44.

Poultry Manure. Plant food in readily available form, dry, easy to use. Mix with equal parts good loam and top-dress lawns. Use at the rate of 50 lbs. per 1000 sq. ft. For gardens use twice as much. 50 lbs. \$2.25; 100 lbs. \$4.25; 500 lbs. \$20.

Sheep-Manure. Much superior to the Sheep and Goat Manure. Has all the essential plant-food elements of stable manure without the bulk, weed seeds, and waste matter. For vegetables, scatter 200 lbs. per 1000 sq. ft. and rake in. Broadcast 100 lbs. per 1000 sq. ft. over the old lawn or rake thoroughly into the top-soil a day or two before seeding a new one. For liquid manure, use one pound to five gallons of water. 5 lbs. 50c.; 10 lbs. 80c.; 25 lbs. \$1.45; 50 lbs. \$2.40; 80 lbs. \$3.20; 100 lbs. \$4; 400 lbs. \$15; ton \$67.

Sulphate of Ammonia. Fast plant-stimulant tending to make soil acid. Increases leaf-growth. When top-dressing lawns apply 1 lb. to every 150 sq. ft., but first mix with several times its bulk of soil or sand. Between vegetable rows scatter 3 lbs. to 100 feet and hoe in. As a liquid dissolve 1 oz. in a gal. of water and apply to the roots, avoiding the plants. Not available.

Wood Ashes. These contain potash and lime. For top-dressing lawns, destroying insects and weeds, particularly moss; use 100 lbs. to 1500 sq. ft. Also good for fruit. 25 lbs. \$1.10; 50 lbs. \$2; 100-lb. bag \$3.50; bbl. (about 200 lbs.) \$6; ton \$50.

House-Plant Food

Plantabbs. A concentrated fertilizer. Easy to use; clean and odorless, inexpensive and work like magic. 35 tablets 25c.; 90 tablets 50c.; 240 tablets \$1; 2 lbs. \$2.75.

Vitamin B₁

Induces greater growth, larger blooms, stronger roots. Apply while sprinkling. Liquid form, 25c. size makes 100 gals.; \$1 size makes 800 gals.

Granulated Peat Moss

It is a well-known garden fact that mechanical soil-condition contributes largely to the success of any garden. Granulated Peat Moss, incorporated liberally into the soil, prevents baking and crusting, improves aeration, contributes to the formation of humus, lightens and makes the soil more friable, acts as a reservoir for soil-moisture and concentrated plant-fertilizers and assures maximum root-development.

By mixing Granulated Peat Moss liberally into the soil at the time of planting, you will be assured of more luxuriant growth of flowers, lawns, and shrubbery during the growing season. For mulching, it is used extensively both for summer moisture-retention and winter-protection, about roses, evergreens, perennial beds, shrubbery.

Trial size \$1 (about 2 bus.) enough to cover 30 sq. ft. 1 inch deep.
Half bale \$2.65 (about 10 bus.) will cover 150 sq. ft. 1 inch deep.
Large bale \$4.50 (about 20 bus.) will cover 300 sq. ft. 1 inch deep.

Forbes Sales Garden on Route 10, Hanover, N. J.

Our field store, pictured below, will be open April 1. You'll find a full choice of the best varieties of Vegetable and Flower Seeds, Lawn Seed, Fertilizers, Summer-flowering Bulbs, Vegetable Plants, Annual and Perennial Flower Plants, Insecticides and Garden Needs.

And while at Hanover enjoy the flower displays we planted last fall. The array of beauty begins in April with Daffodils and Narcissus in many rare varieties. In May there will be brilliant displays of Tulips followed into June by Bearded Iris in a multitude of colorings. Through July the *Iris Kaempferi* in many varieties will share your interest with plantings of Petunias which will continue right up to frost.

As we are large suppliers of highest quality Vegetable seeds to commercial vegetable growers throughout the United States, we are devoting more effort to stock seed selection and vegetable strain improvement. Comparative field trials, under actual growing conditions, show the relative merits of specific varieties. This work is important to the war effort as it directly relates to both the quality and quantity of future vegetable food production.

ZOTOX. Kills crab-grass plants and seed without destroying lawn grass. Mix with water and sprinkle on. One pound treats 2000 sq. ft. ½ lb. \$1; lb. \$1.50; 2 lbs. \$2.50.
